

BOYCOTT TEVA

Your prescription, your choice!

Did you know Teva is an Israeli drug company that openly supports the attack on Palestine?

Saying NO to Israeli products pressures Israel to end its violence against Palestinians!

Nearly all medicines made by Teva are made by other companies too. It's your right to ask for another brand of medicine

What are your options?

Do tell your doctor - **NO TEVA MEDICINES PLEASE**

Do tell your pharmacist - **NO TEVA MEDICINES PLEASE**

DON'T stop taking your medicines.

HEALTH WORKERS 4PALESTINE

Educate, Empower, Act: The True Cost of Teva Pharmaceuticals

Teva, the Israeli pharmaceutical giant, profits from practices that harm global health and Palestinian rights. Here's why we must take action.

What You Need to Know:

1. Overcharging & Corruption

- **Monopoly Abuse:** Fined over \$900 million in 2024 alone by the US and EU for blocking cheaper drugs and price-fixing.
- **Blocking Medicine:** Manipulates patents to keep essential drugs expensive, hurting low-income communities.
- **Global Bribery:** Accused of bribing officials in multiple countries, putting profit before ethics.

2. Profiting from Occupation

- **Captive Market:** Israeli restrictions force Palestinians to buy Teva products, creating a guaranteed market.
- **Funding the Occupation:** Teva's revenue supports Israel's economy, indirectly funding settlements and military operations.
- **Operating in Illegal Settlements:** Runs facilities in occupied territory, violating international law.

Why Boycotting Teva Matters

- **Fight High Drug Prices:** Hit them where it hurts – their profits.
- **Support Human Rights:** Send a clear message against profiting from occupation.
- **Demand Ethics:** Push for a fair and transparent pharmaceutical industry.

How You Can Challenge Teva

- **Choose Ethical Alternatives:** Ask your pharmacist or doctor for medications from companies with transparent, ethical practices.
- **Join the Boycott:** Support the BDS movement (Boycott, Divestment, Sanctions) to apply economic pressure.
- **Spread the Word:** Share this information. Awareness is the first step to change.

A Note to Healthcare Professionals:

You are on the front line. Ethical prescribing means choosing non-Teva alternatives when possible and informing patients about why it matters. Advocate for transparency in the industry.

Boycotting Teva is a stand for affordable medicine, corporate ethics, and human rights.

Choose fairness. Choose justice. Choose better.
